Kapish Pandey

Senior Software Engineer (React / Node / SDKs / Mobile Apps)

Gurgaon, Haryana | +91 8073820914 | kapish.p03@gmail.com | github.com/kapish2025

Professional Summary

Senior Software Engineer with 7+ years of experience building scalable SDKs, full-stack applications, mobile apps using Capacitor, architecting complete systems, and delivering end-to-end products including SalonMind and MyCar Platform. Strong in React, Node.js, MongoDB, Playwright E2E testing, Postman API validation, Figma UI/UX, and product-focused engineering.

Core Highlights

Full-Stack Development | SDK Development | Mobile Apps (Capacitor) | Figma UI/UX | Playwright E2E Testing | Postman API Testing | Authentication Systems | Subscription Models | System Architecture | AI-assisted Development

Professional Experience

Quest Global (Client – Jio Platforms Ltd)
Senior Software Engineer | Mar 2018 – Present | Mumbai / Remote

- Built and maintained JioAds Web & KaiOS SDKs used across partner and internal apps.
- Designed modular SDK architecture: authentication, environment configs, logging, events, analytics.
- Developed Playwright-based E2E automation covering SDK integration scenarios.
- Created Postman-based API test suites for partner onboarding and API lifecycle validation.
- Collaborated with product and QA teams, improving partner integration time by 40%.
- Used GitHub Copilot + ChatGPT for faster development and documentation.

Product Engineering – Lead Engineer

Lead Engineer & System Architect – SalonMind

- Built complete SaaS platform for salon operations with Admin, Employee, and Client portals.
- Designed full Figma UI/UX including dashboards, workflows, and reusable components.

- Architected backend modules: payroll, commission engine, RBAC, service management, appointments.
- Developed mobile app using Capacitor for staff & manager workflows.
- Implemented Playwright E2E test coverage (in progress).
- Created Postman API test suites covering all backend systems.

Lead Engineer & System Architect – MyCar Platform

- Built complete mobile apps for Users & Partners using Capacitor (Android/iOS).
- Designed subscription engine, cleaner assignment, daily logs, check-in/out, proof uploads.
- Created all Figma UI/UX including onboarding, subscriptions, cleaner dashboard, and workflows.
- Built scalable backend for multi-society, multi-partner operations.
- Created Postman API tests for critical workflows.
- Developing Playwright-based automation for user journeys (in progress).

Technical Skills

Frontend: React.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, MongoDB
Mobile Apps: Capacitor (Android/iOS)
Testing: Playwright (E2E), Postman (API Testing)
Design: Figma (UI/UX, Wireframes, Prototyping)
Dev Tools: Git, GitHub, VS Code, Android Studio, Xcode
Core Expertise: SDK Development, Product Engineering, System Architecture

Education

Master of Computer Applications (MCA) – School of Management Sciences, Varanasi | 2016
